

Fungicidal mixtures based on dithianon

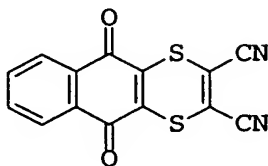

Abstract

5

Fungicidal mixtures, comprising

A) the compound of the formula I

10

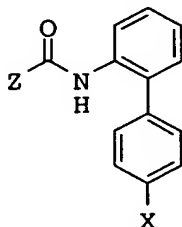

I

and

15

B) a biphenylamide of the formula II,

20

II

in which Z is a pyridyl ring or a five-membered heteroaryl ring
25 which, in addition to carbon atoms, contains one or two nitrogen
atoms or one nitrogen atom and one oxygen or sulfur atom, where Z
carries one to three identical or different substituents from the
group consisting of halogen, methyl and trifluoromethyl, and X is
halogen, in a synergistically effective amount, methods for
30 controlling harmful fungi using mixtures of the compounds I and
II and the use of the compounds I and II for preparing such
mixtures are described.
